BLACK STAMPED STEEL DISC BASES

TUBE BOTTOM (BOTTOM)

Welded anchor plate at bottom of tube.
Anchor plate also has a welded nut on back of anchor plate.

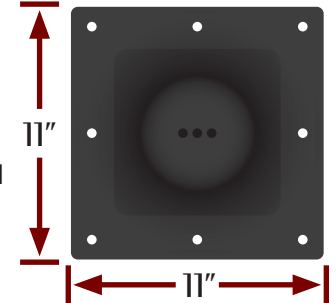

SPIDER / TUBE TOP (SIDE)

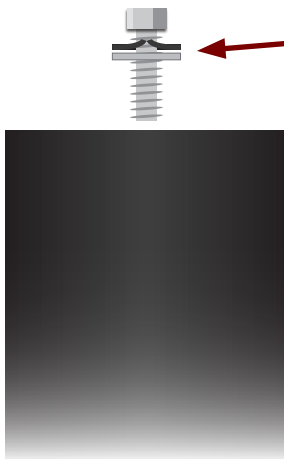

Oak Street's spiders are bigger than most competitors - providing additional strength & durability

Spider is welded to the tube

SPIDER (TOP)

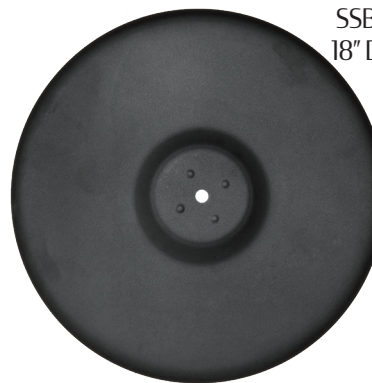

TUBE BOTTOM (SIDE)

Oak Street uses a short bolt to screw into the welded anchor plate. This is a much improved method than the competitors, which use a long rod that will torque & stretch when force is applied - making it permanently loose.

Our bolt also has both a lock washer & a flat washer. The flat washer keeps the lock washer from catching on the anchor plate, preventing the bolt from becoming loose.

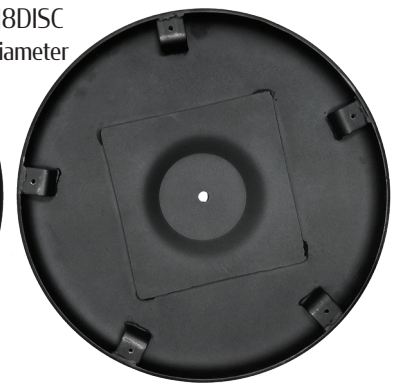

BASE (TOP)

Stamped Steel base - most competitors use cast iron bases, which is a soft & brittle metal.

BASE (BOTTOM)

SSB18DISC
18" Diameter

Welded glide tabs with hollow back - not possible with cast iron bases - drastically reduce the chances of having a bad tab for glides.

BASE SIZE	PART #	WEIGHT	LOCATION
18" Disc	SSB18DISC	21 lbs	IA, NC, CA
22" Disc	SSB22DISC	32 lbs	IA, NC, CA
30" Disc	SSB30DISC	57 lbs	IA, NC, CA

Oak Street bases are the best in the industry - quick to assemble & extremely durable- at virtually the same price as competitor's cast iron bases.

- Constructed of Black Stamped Steel for unparalleled strength & stability - will not fracture under heavier weights like cast iron bases
- Easy two-piece construction for quick assembly
- Includes non-marring adjustable levelers
- Spider attaches to tabletop with (8) 3/4" - #10 screws
- Recommended to use one size larger base for bar height applications
- Compatible with 3" or 4" standard height or bar height tubes
